

# DIGITAL COLOUR LABEL MINI-PRESS

## Flexibility, Durability, Reliability

The TrojanLabel® T2-C is a one of a kind tabletop printing press that incorporates the features and functionality of a large production press into a footprint small enough to fit into any size print department.

The T2-C is designed for consistent, high volume 24/7 production. Accurate image placement, tension control, superior print resolution, built-in-slitters, and reduced total cost of ownership, are just some of the key features that make the T2-C so unique.

A perfect combination of ease of use, precision, and quality make the label printing solution designed to give both owners and users peace of mind.

### Flexible Packaging

Food-safe low migration inks for use on flexible packaging material with a variety of barrier options.

### Pre-Die Cut Labels

TrojanControl precision makes it effortless to print on pre-die cut labels in perfect registration.

### In-line Slitters

Increased throughput with built-in slitter feature allows to slit multiple across label constructions to individual finished rolls while you print. Produce up to 8 separate printed output rolls from a single input roll.
